While Asia’s nearly 3.8 billion people account for over 60% of the world population, including over 1 billion each from China and India, the 10 ASEAN countries are home to almost 599 million people or about 9% of the world population.

Country estimates show that almost 30% (about 127 million) of the adult ASEAN population are current smokers, accounting for 10% of the world’s 1.25 billion adult smokers. Over the past half century, the global annual tobacco-attributable mortality rate has risen at a disproportionately rapid pace: from an estimated 0.3 million deaths in 1950 to almost 6 million in 2011. The ASEAN region accounts for almost 10% of these deaths, losing one person for every five lives claimed by tobacco.

“Tobacco use is the world’s number one preventable killer. We know this statistically, beyond a shadow of a doubt. In a world undergoing economic upheaval, with populations ageing, chronic diseases on the rise, and medical costs soaring, tackling a huge and entirely preventable cause of disease and death becomes all the more imperative.”

Dr Margaret Chan
Director-General of the World Health Organization
Keynote address at the 15th World Conference on Tobacco or Health, Singapore, 20 March 2012

### Percentage distribution of total adult smokers in ASEAN countries

**ASIA Population = 598,499,845**

Adult population (>15 years old) = 431,641,569

Number of adult smokers = 127,169,300 (29.5% of adults in ASEAN)

*based on 2010 population estimates; adults = aged 15 years and above; except for Malaysia (15 years and above), does not include use of smokeless tobacco products
Most Popular Foreign Brand

Use economy. despite findings by the World Bank and others that tobacco believing that the FCTC will be economically ruinous, industry, and it continues to try to scare governments into Predictably, the FCTC has come under attack by the tobacco smuggling. and strengthen legislation to clamp down on tobacco products; protect people from exposure to tobacco smoke; and strengthen legislation to clamp down on tobacco smuggling. Predictably, the FCTC has come under attack by the tobacco industry, and it continues to try to scare governments into believing that the FCTC will be economically ruinous, despite findings by the World Bank and others that tobacco control measures are good both for public health and the economy.

The WHO FCTC recognizes that price and tax measures are “an effective and important means of reducing tobacco consumption by various segments of the population, in particular young persons (Article 6).” Duty-free sales of tobacco products are also discouraged. Generally, every 10% increase in the price of cigarettes will reduce youth smoking by about 7% and overall cigarette consumption by about 4%.

Increasing tobacco taxes is also good for bolstering government coffers and may be used to establish and sustain national tobacco control programs and institutions.

Status of Tobacco Control Law Per Country

Brunei Darussalam: Tobacco Order 2005 and Tobacco Regulations 2007
Cambodia: National Tobacco Control Law already drafted
Indonesia: Under National Health Law Nr. 36/2009 regarding Health [Chapter VI: Health Efforts; part 17: Security Addictive Substance article 114, article 115 paragraph (1), article 115 paragraph (2), article 116]
Lao PDR: Law on Tobacco Control, 2009
Malaysia: Control of Tobacco Products Regulation 2004 and Control of Tobacco Product (Amendment) Regulations 2008; 2009; 2010 and 2011 under the Food Act 1983, National Tobacco Control Law already drafted
Myanmar: The Control of Smoking and Consumption of Tobacco Product Law (The State Peace and Development Council Law No. 5/2006)
Philippines: Tobacco Regulation Act 2003 (Republic Act 9211)
Singapore: Tobacco (Control of Advertisements and Sale) Act, the Prohibition on Smoking in Certain Places Act, Smoking (Control of Advertisements and Sale of Tobacco) (Labelling) (Amendment) Regulations 2006, Circular No.12/2008 New Marking Requirement on Cigarette Sticks
Vietnam: Decision No.1315/QD-TTg of the Prime Minister adopted the implementation plan Framework Convention on Tobacco Control for Vietnam and Directive No.12/CT-TTg of Prime Minister on strengthening tobacco control activities, Tobacco Control Law already drafted

“IT IS A TREATY AIMED AT SAVING LIVES. HUNDREDS OF MILLIONS OF LIVES, ONLY IN OUR OWN LIFETIME.”

Dr. Gro Harlem Brundtland, as WHO Director-General to the Intergovernmental Negotiating Body on the WHO FCTC at its sixth session (Geneva, Feb. 17, 2003)

- “It is a treaty aimed at saving lives. Hundreds of millions of lives, only in our own lifetime.”

- Dr. Gro Harlem Brundtland, as WHO Director-General to the Intergovernmental Negotiating Body on the WHO FCTC at its sixth session (Geneva, Feb. 17, 2003)
It is well known that half the people who smoke regularly today – about 650 million people - will eventually be killed by tobacco. Equally alarming is the fact that 600,000 of people who have never smoked die each year from diseases caused by breathing secondhand smoke (SHS).

Breathing SHS causes cancer, as well as many serious respiratory and cardiovascular diseases in children and adults, often leading to death. There is no safe level of human exposure to SHS.

These are the indisputable conclusions reached by international and national health authorities, backed up by extensive rigorously reviewed and published research results over many years.

Article 8 of the WHO FCTC requires all Parties to protect all persons from exposure to tobacco smoke.

Eliminating smoking in indoor spaces fully protects nonsmokers from exposure to secondhand smoke. Separating smokers from nonsmokers, cleaning the air, and ventilating buildings cannot eliminate exposures of nonsmokers to secondhand smoke."

2006 U.S. Surgeon General’s Report on The Health Consequences of Involuntary Exposure to Tobacco Smoke

With millions of smokers either dying from tobacco-related illness or quitting each year, it is crucial for the financial health of the tobacco industry to keep recruiting new smokers. Since the majority of smokers begin before the age of 18, the logic of the industry dictates that it must somehow reach young people, and there is compelling evidence that much of tobacco industry advertising and promotion is directed at children and successfully recruits new tobacco users.

“Parties recognize that a comprehensive ban on advertising, promotion and sponsorship would reduce the consumption of tobacco products (WHO FCTC Article 13).”

The WHO FCTC requires all Parties to undertake a comprehensive ban on tobacco advertising, promotion and sponsorship within five years of ratifying the treaty.

“We know that a comprehensive ban on tobacco product advertising and promotion has a marked and beneficial influence on changing social attitudes about smoking and reducing smoking rates, especially among the young.”

Dr. Shigeru Omi, Former Regional Director World Health Organization Western Pacific Regional Office for presentation of World No Tobacco Day 2005 Awards (Beijing, March 31, 2004)

Eliminating smoking in indoor spaces fully protects nonsmokers from exposure to secondhand smoke. Separating smokers from nonsmokers, cleaning the air, and ventilating buildings cannot eliminate exposures of nonsmokers to secondhand smoke.

We know that a comprehensive ban on tobacco product advertising and promotion has a marked and beneficial influence on changing social attitudes about smoking and reducing smoking rates, especially among the young.
While many tobacco users generally know that tobacco use is harmful, studies show that most are unaware of the true risks, even in countries in which there has been a great deal of publicity about the health hazards of tobacco.

As the World Bank has noted, “People’s knowledge of the health risks of smoking appears to be partial at best, especially in low and middle-income countries where information about these hazards is limited.”

Smokers tend to be even less aware of the risks of tobacco smoke to others.

Health warning labels on cigarette and other tobacco product packages as well as all marketing materials, help inform consumers of these dangers, are an important component in a national health education program and cost government nothing.

Although Article 11 of the WHO FCTC only requires health warning labels that cover, at a minimum, 30% of the principal display areas of tobacco packages, Parties agree that health warning labels ideally should cover 50% or more of the principal display areas of each packet. Health warning labels must include rotating messages in the principal languages of the Party, and may include pictures or pictograms.

Prominent health warnings and messages on tobacco product packages have been found to lead to an increased awareness of health risks and an increased desire to quit, even among smoking youth.

Q: Which country has a ban of descriptors such as “light” and “mild”?

A: Malaysia, Singapore and Thailand

WHO FCTC Article 5.3 requires that Parties shall act to protect their public health policies from the commercial and other vested interests of the tobacco industry. This is regarded as a critical measure in the implementation of the treaty as the industry will stop at nothing to derail, dilute, and delay the development and implementation of effective tobacco control policies.

In 2008, based on a well-documented evidence of strategies and tactics used by the tobacco industry over a span of decades to interfere with the setting and implementing of tobacco control measures, the Conference of the Parties to the WHO FCTC adopted the “Guidelines for implementation of Article 5.3 of the WHO Framework Convention on Tobacco Control on the protection of public health policies with respect to tobacco control from commercial and other vested interests of the tobacco industry” (Article 5.3 Guidelines).

The guidelines contain four guiding principles and eight recommendations:

Principle 1: There is a fundamental and irreconcilable conflict between the tobacco industry’s interests and public health policy interests.

Principle 2: Parties, when dealing with the tobacco industry or those working to further its interests, should be accountable and transparent.

Principle 3: Parties should require the tobacco industry and those working to further its interests to operate and act in a manner that is accountable and transparent.

Principle 4: Because their products are lethal, the tobacco industry should not be granted incentives to establish or run their businesses.

RECOMMENDATIONS

1. Raise awareness about the addictive and harmful nature of tobacco products and about tobacco industry interference with Parties’ tobacco control policies.

2. Establish measures to limit interactions with the tobacco industry and ensure the transparency of those interactions that occur.

3. Reject partnerships and non-binding or non-enforceable agreements with the tobacco industry.

4. Avoid conflicts of interest for government officials and employees.

5. Require that information provided by the tobacco industry be transparent and accurate.

6. Denormalize and to the extent possible regulate activities described as “socially responsible” by the tobacco industry, including but not limited to activities described as “corporate social responsibility”.

7. Do not give preferential treatment to the tobacco industry.

8. Treat state-owned tobacco industry in the same way as any other tobacco industry.
Tobacco is truly a global problem. Nearly 6 million people die from tobacco-related illness each year. If current trends continue, this figure will rise to more than 8 million per year by the year 2030, with 70% of those deaths occurring in developing countries.

Just as infectious diseases know no political boundaries, leaving individual countries incapable of effectively containing them, the tobacco epidemic also requires international cooperation if it is to be controlled.

Based on the WHO FCTC and its guidelines, ASEAN governments should:

1. Promulgate and effectively implement tobacco control laws that are consistent with the spirit of the WHO FCTC, including:
   - Increasing taxes (optimally 65% of retail price minimum) on tobacco products to make them less affordable, especially to young people and the poor, and dedicate such taxes to establish and sustain health promotion foundations and effective evidence-based tobacco control programs (Article 6)
   - Banning all forms of direct and indirect tobacco advertising, promotion and sponsorship including at points of sale (Article 13)
   - Implementing 100% Smoke-free workplaces and public places (Article 8)
   - Requiring large, prominent, pictorial health warnings covering at least 50% of the principal display areas (Article 11)
   - Banning the use of deceptive labels for tobacco such as “light” and “mild” (Article 11)
   - Cooperating on cross-border issues such as illicit tobacco trade and cross-border advertising with the aim of putting an end to them (Articles 15 and 13)

2. Recognize that regional and global policy interventions are needed to address the international problem of negative health and socio-economic impacts from tobacco use, thus emphasizing the need to put tobacco control on the agenda of ASEAN governments’ meetings (Article 22)

3. Establish permanent government units with staff working full-time on tobacco control (Article 5)

4. Promote the participation of non-government organizations and other groups not affiliated with the tobacco industry in the development of national and regional tobacco control programs (Article 12)

5. Establish measures to limit interactions with the tobacco industry and ensure the transparency of those interactions that occur (Article 5.3)
About the ASEAN Focal Points on Tobacco Control (AFPTC)

A. BACKGROUND

Tobacco use is the leading cause of preventable diseases and deaths in many countries. It shortens lives, harms others and imposes a huge cost to the taxpayer in terms of health expenditures. The battle against tobacco use remains one of the most important public health challenges faced by ASEAN Member States, because of regional trends of high tobacco consumption.

Cognizant of the need to strengthen current efforts towards complete implementation of the WHO FCTC, smoking prevention and tobacco control have now become one of the priority objectives in the public health policies of ASEAN Member States. Following the initiative of Thailand to develop a mechanism for ASEAN Cooperation in tobacco control, the Preparatory Meeting of ASEAN Senior Officials on Health Development for the 9th ASEAN Health Ministers Meeting (PrepSOMHD for 9th AHMM) held in Manila, Philippines on October 2009, agreed on the establishment of ASEAN Focal Points on Tobacco Control. The Focal Points will ensure that effective tobacco control measures and sustained responses are in place and in line with the ASEAN Social-Cultural Community Blueprint (2009-2015), and the WHO-FCTC in order to curb tobacco-related diseases and deaths, reduce the prevalence of tobacco use, protect people from exposure to secondhand smoke, and improve the health and quality of life of the people.

B. OBJECTIVES

1. To provide a platform for establishing common goals amongst ASEAN Member States in formulating a mutually beneficial regional strategic plan to address important tobacco control issues;
2. To strengthen and support effective implementation of tobacco control measures in line with recognized regional and international frameworks or action plans, such as the WHO Framework Convention on Tobacco Control (FCTC) in ASEAN Member States; and
3. To develop, implement, monitor, review progress and evaluate ASEAN regional cooperation, programs/projects and action plans on tobacco control.

C. STRATEGY

1. To strengthen the ASEAN regional network through sharing of information, experience and best practices on tobacco control;
2. To facilitate regional technical cooperation and coordination in tobacco control in the ASEAN region, taking into consideration the strength and diversity of ASEAN Member States;
3. To assist ASEAN Member States to implement and strengthen tobacco control programs, in line with international agreements, rights, obligations, and/or recommendations;
4. To strengthen multilevel collaboration and partnerships in tobacco control amongst ASEAN Member States, Dialogue Partners, international organisations, academia, civil society organisations, and private sectors not related to or having any vested interest with the tobacco industry;
5. To develop a regional institutional mechanism and capacity building activities on tobacco control in line with the goal for an ASEAN Community.

D. SCOPE OF WORK

In line with the above objectives and strategies, the work of the ASEAN Focal Points on Tobacco Control (AFPTC) will be guided by the following:

1. To formulate and recommend to Senior Officials Meeting on Health Development, ASEAN Health Ministers Meeting and/or ASEAN Summit, policies, strategies, and programs for regional cooperation on tobacco control;
2. To implement relevant directives emanating from the Senior Officials Meeting on Health Development (SOMHD);
3. To develop, adopt and review regional work programs/activities for regional cooperation in tobacco control;
4. To monitor and evaluate outcomes of the regional work programs/activities to realise the objectives of the AFPTC;
5. To facilitate ASEAN Member States in implementing relevant international agreements, rights, obligations, and/or recommendations on tobacco control in particular tobacco taxation, protection from exposure to tobacco smoke, packaging and labelling of tobacco products, tobacco advertising, promotion and sponsorship;
6. To facilitate ASEAN Member States in addressing trans-boundary issues on tobacco control, including illicit trade on tobacco product, tobacco taxation, monitoring new emerging tobacco products and cross-border tobacco advertising, promotion and sponsorship;
7. To serve as a forum for sharing experiences and evidence-based best practices in tobacco control with an emphasis on utilizing cost-effective methods;
8. To convene ad-hoc consultation among experts, as appropriate, to assist AFPTC in carrying out its functions;
9. To promote intra-sectoral links with related ASEAN bodies through the ASEAN Secretariat;
10. To formulate ASEAN common position on tobacco control, as and when appropriate, in preparation for regional and international meetings/conferences;
11. To facilitate ASEAN Member States in establishing long term funding from the government for tobacco control.

a. Circulate AFPTC endorsed guideline to focal points from each AMS for utilization
b. Implement guideline for “100% Smoke-free Environment” among AMS
c. AFPTC to monitor utilization and implementation of guideline

4. Identify settings/pilot areas for “100% Smoke-free Environment” among AMS
a. Localized Policy (based on the template/guideline) developed and implemented in the pilot area/setting
b. AFPTC to monitor progress

5. Policy development on ASEAN’s Event Smoke-free for all events sanctioned by the ASEAN Secretariat
a. AFPTC prepares and approves ASEAN’s Event Smoke-free Submission to SOMHD for consideration
b. Facilitation of policy advocacy at ASEAN Forum/Platforms as appropriate such as the 11th AHMM or the ASEAN Summit
c. Dissemination of the approved policy based on directions of SOMHD
   c.1 Circulate to all working groups under health for feedback utilizing a feedback template (new activity)
c.2 Determine process of sharing of policy for possible adoption from other non-health sector/divisions (e.g. possible consultation with focal points in SOCCOM) (new activity)
c.3 Share to the 11th AHMM (new activity)

6. Launching of Towards a Smoke-free ASEAN Campaign:
a. Prepare and conduct the program for the Launching of Smoke-free ASEAN Campaign
b. Circulate SOMHD the campaign materials endorsed by AFPTC
c. Dissemination of the Smoke-free ASEAN promotional material including a Smoke-free ASEAN year-end report

7. Update online Smoke – free ASEAN year-end Report (new activity)

---

| STRATEGY II. Protect tobacco control policy of the ASEAN countries from tobacco industry interference |
| Desired Outcome: ASEAN Member States aware and apply the best practices to protect tobacco control policy from tobacco industries interference |
| Lead Countries: Thailand/Singapore |

1. Sharing ASEAN Policy to protect tobacco control policy from tobacco industry interference
   - January 2012 (Follow up workshop will be conducted back-to-back with the 3rd AFPTC Meeting)
   - AFPTC in collaboration with ASEAN Secretariat, SEATCA and WHO
   - Lead Country: Thailand
   - ASEAN
   - Identified next step

2. Organize an ASEAN Workshop on Article 5.3 (new activity) TOR development by lead country
   - May 2012
   - AFPTC and SEATCA
   - Lead Country: Thailand
   - ASEAN
   - A set of AFPTC recommendations on protecting tobacco control policy from tobacco industry interference

---

| STRATEGY III. Price and Tax Measures to Reduce Demand for Tobacco |
| Desired Outcome: ASEAN Member States apply tobacco tax and price measure as recommended by WHO and World Bank |
| Lead Countries: Thailand/Singapore |

1. Strengthen capacity of AFPTC to address challenges on tobacco taxation policy (meeting, sharing information, technical assistance) and develop AFPTC Recommendations on tobacco tax and price
   - September 2011 (back to back with WHO WPRO tobacco control focal points meeting)
   - AFPTC in collaboration with WHO and SEATCA
   - Lead Country: Thailand
   - ASEAN
   - AFPTC Recommendations on Tobacco Tax
   - Tobacco tax strategic priorities discussed by ASEAN member states

2. Finalization of AFPTC Recommendations on Tobacco Tax (new activity)
   - Q2 – Q4
   - Lead country: Singapore
   - Recommendations on Tobacco Tax finalised

---

| STRATEGY IV. Sustainable Funding for tobacco control and health promotion for ASEAN Member States |
| Desired Outcome: ASEAN Member States apply tobacco tax and price measure as recommended by WHO and World Bank |
| Lead Countries: Thailand/Singapore |

1. Facilitate sharing of best practices/lessons learned/technical assistance to have sustainable funding for tobacco control and health promotion and organize a regional workshop on sustainable funding for tobacco control and health promotion
   - September 2011 (back to back with WHO WPRO tobacco control focal points meeting)
   - AFPTC in collaboration with Thai Health, SEATCA and WHO
   - Lead Country: Thailand
   - ASEAN
   - Number of ASEAN member states agree to develop options for sustainable funding for tobacco control and health promotion

---
2. Develop Guidelines on Sustainable Funding for tobacco control for ASEAN countries
   - September 2011 (back to back with WHO WPRO tobacco control focal points meeting)
   - APTC in collaboration with WHO and SEATCA
   - Lead Country: Thailand and Singapore
   - ASEAN member states, WHO and SEATCA
   - Sustainable funding for tobacco control discussed by ASEAN member states

3. Finalise ASEAN guideline on sustainable funding for tobacco control (new activity)
   - a. SOMHD endorsement
   - b. Sharing best practices at the APTC
   - 2012
   - APTC and SEATCA
   - Lead Country: Thailand
   - Guideline developed and implemented

### STRATEGY V. Packaging and Labeling of Tobacco Products

**Desired Outcome:** Packages of all tobacco products in ASEAN Member States with pictorial health warnings

**Lead Country:** Brunei Darussalam/Malaysia

#### Lead Countries specified in the “Activity” refer to the Member States that will be responsible for the implementation of the specific activities.

#### Lead Countries specified in the “Strategy” refer to the Member States that will be responsible for overseeing the implementation of the strategic direction (i.e. Strategy II-VII).

### Remarks:

- SEATCA -- The Southeast Asia Tobacco Control Alliance is a non-profit international organization. They work closely with key partners in ASEAN Member States to generate local evidence through research programme; to enhance local capacity through advocacy fellowship and, to be the catalyst in policy development through regional fora and in-country networking. For more information, please visit www.seatca.org.
- Responsibilities of ‘Lead Countries’ are stipulated in the TOR.
- Lead Countries specified in the “Strategy” refer to the Member States that will be responsible for overseeing the implementation of the strategic direction (i.e. Strategy II-VII).
- Lead Countries specified in the “Activity” refer to the Member States that will be responsible for the implementation of the specific activities.
T he Southeast Asia Tobacco Control Alliance (SEATCA) works closely with key partners in ASEAN member countries to generate local evidence through research programs, to enhance local capacity through advocacy fellowships, and to be the catalyst in policy development through regional fora and in-country networking.

SEATCA has been in existence since 2001 to act as supportive base for government and non-government tobacco control workers and advocates in the SEA region, primarily in Thailand, Malaysia, Cambodia and Vietnam. Currently, the alliance has formally extended to three more countries: Indonesia, Lao PDR, and the Philippines. By adopting a regional policy advocacy mission, it has supported member countries to ratify and implement the WHO Framework Convention on Tobacco Control (FCTC).

SEATCA was awarded the WHO Western Pacific Regional Office’s 2004 World No Tobacco Day Award in recognition of its major contribution to tobacco control in the region. “SEATCA has emerged as a major catalyst for advances made in tobacco control in the South East Asia Region, especially with regard to policy and legislation.”- Dr. Shigeru Omi, Regional Director for the Western Pacific Regional Office at the presentation of 2004 World No Tobacco Day Awards

SEATCA Objectives

1. To form a supportive base for government and non-government tobacco control workers in their efforts to promote the implementation of evidence-based national tobacco control measures.
2. To encourage greater cooperation between tobacco control workers at national and regional levels and to act as a regional leader on issues which affect all countries in the region.
3. To facilitate information transfer and the sharing of experience and knowledge, to organize capacity building exercises, and to coordinate national and regional initiatives in tobacco control work.
4. To strengthen national tobacco control movements and to bring Southeast Asian issues into the international tobacco control arena.

SEATCA Activities

1. Building local evidence through collaborative research program which provides funding, capacity building training, mentorship and platform to disseminate research studies to policy makers. This program generates local evidences and knowledge for policy development.
2. Capacity building which focuses on strengthening local capacity on policy development through programs named ASEAN fellowship program and national tobacco control working group.
3. Regional network for policy development through SEATCA regional forum which highly responds to in-country policy movement. SEATCA organizes two regional workshops per year focusing on policy issue like tobacco tax, health warnings, best practice on advertising ban, etc.

Impact on advancing tobacco control in the region

SEATCA programs have contributed towards a more progress movement in each country and in the region as follows:

1. Progressive policy development in each country
Advancing tobacco control policy in the region on four major issues (taxation advertising ban, smoke-free areas and health warnings) and FCTC ratification and implementation is the most successful work of SEATCA.

2. Strengthening national tobacco control working group
a. Governmental national committee in Vietnam, Cambodia and Lao PDR comprise of related ministries to set up policy and to monitor progress. SEATCA’s programs have provided them the chance to discuss, to share and learn on various policy matters.
b. Informal tobacco control working groups in Lao PDR, Malaysia, Cambodia and Vietnam have been facilitated. These groups comprised of NGOs, Ministry of Health, WHO, academics, and tobacco control workers and advocates to think-tank to discuss plan and coordinated effort to push for better country policy.

3. Generating more local evidence for advancing tobacco control policy.
Products of SEATCA collaborative research program have potentially been used for policy development especially on the issue of taxation, advertising ban, tobacco and poverty reduction, and expansion of smoke-free areas. The products of the collaborative research program will also be shared and distributed at the regional and international levels. Moreover, a network of local and regional researchers, with ties to regional and international experts has been established.

4. Increased number of tobacco control workers and capacity to conduct more tobacco control advocacy.
SEATCA has successfully implemented the ASEAN fellowship advocacy program where fellows carried out a variety of advocacy projects such as media advocacy to counter tobacco industry tactics and increasing public awareness, mobilizing youth to lobby parliamentarians, mobilizing mons and UN agencies to lobby government to sign and ratify the Framework Convention on Tobacco Control (FCTC) - all these with utilization of all types of media to advocate. This advocacy program contributed to strengthening national tobacco control activities and developed new advocates in the region.
